

***Exceptional Mechanical Design and Analysis Solutions,
Available When & Where You Need It!***

Motovated is an award winning team of talented engineers who bring enthusiasm, common sense and analytical expertise to your projects. Motovated prides itself on assisting clients achieve their goals. In 2009 Motovated helped Sprintec win the **World SuperBoat Jetsprint Championship!**

With an annual turnover exceeding \$1million, no job is too big or too small for Motovated. We enjoy the challenge of helping with large projects, but we're still small enough to be responsive and available to attend to your needs at very short notice. If the need arises, we can have our engineers in-house helping to solve your problems today!

Motovated can engineer your vision which:

- reduces your investment
- reduces your time to market
- reduces your risk

While:

- increasing your products functionality
- increasing your products durability
- increasing your products lifespan

Motovated does this by virtually prototyping your machines or products, providing computer based validation of Fit, Function, Capacity, Stress, Strain, Flow etc.

Typically firms incur significant problems during actual prototyping. These problems result in expensive delays and rework. And this usually occurs just as you are trying to go to market, when you can least afford these costs and delays! Worse yet, if these issues are not caught prior to production, warranty claims on your initial production runs can eliminate your profits, as well as spoil the markets' perception of your product and your brand.

Motovated has developed a unique mentoring system for our engineers which ensure this doesn't happen. This mentoring expands and maintains our teams' skills and experience. All this ensures that Motovated can engineer your vision, providing cost savings, quicker time to market and better products, when and where you need it.

Major awards include:

- **2008 Champions Canterbury, Small Enterprise Service Award Winner**
- **2009 Export NZ, Small to Medium Emerging Exporter of the Year finalist**

Call and organise to stop in today... Have a coffee and a chat on us!

Taking the stress out of engineering your vision!
